CASTER WHEEL TYPES

Phenolic: Solid black phenolic resin/canvas duck wheel. Will not crush under heavy loads. Good for all types of surfaces from wood to concrete. Not affected by most corrosive chemicals. Will tolerate temperatures from a low -28°C to a high of 120°C.

Full Pneumatic: Air filled black rubber tire offers excellent shock absorbing properties. Smooth, quiet rolling over rough, uneven surfaces and outdoor terrain. Not recommended on floors with metal shavings or corrosive chemicals.

Mold-On Rubber: Moulded rubber wheel bonded to a spoked cast iron core. The iron core gives it strength while the moulded rubber provides easy, smooth and quiet rolling over rough terrain.

Resilient Non-Marking: Used for uneven surfaces and carpet areas. Its quiet rolling feature make it ideal for both institutional and industrial applications. Will resist wet conditions and corrosive chemicals.

Polyolefin: Plastic wheel with high impact strength and non-chipping properties. Oil, grease and chemical resistant.

HEAVY DUTY PLATFORM TRUCKS

WOOD DECK PLATFORM

- Sturdy 2" x 2" angle iron frame, with hardwood maple decking
- Ideal for carrying objects that scuff by metal to metal contact
- Steel frame absorbs shocks and handles uneven/heavy loads

ALL-STEEL PLATFORM

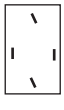
- Heavy 11 gauge, reinforced channel formed deck arc welded for maximum strength and long lasting rigidity
- Ideal for loads up to 2000 lbs

KLETON

CASTER PLACEMENT

- Available in standard-corner or diamond-tilt pattern
- Diamond tilt pattern allows the truck to tilt-balance slightly on the center side casters, allowing the truck to turn on its own length

Standard Corner Placement



Diamond Tilt Placement

CASTER SELECTION:

To select the correct caster that is required for a specific application determine:

1) the platform size needed
2) the maximum load capacity it will carry
3) the type of floor surface it will roll on i.e., concrete, wood, tile etc...
4) the floor condition i.e., smooth, uneven, wet, chemicals, metal shavings, temperature etc.
